## WORK EXPERIENCE

### Hydroponics

July 2022 - September

Frontend Engineer

Israel

- Hydroponics is an Israel-based startup, which specializes in gathering crops related data and providing solutions for improving crop yield and other metrics by using that data effectively to farmers. **Tech Stack- Nextjs, express, styled-components, sql, twillio, jest,redux.**
- As Frontend Engineer, I oversaw the product roadmap, and implemented critical features and testing.
  - Improved User Experience by a huge margin with the implementation of chartJS & filters to show the metrics visually.
  - Introduced Good programming practices by implementing testing & greatly reducing redundant code resulting in improved performance by 20% and better readability.

### GraveYard

June 2022 - Present

FullStack Developer

- GraveYard is an open source highly functional discord bot that is created as a tool to manage discord channels with a huge number of participants by admins. It's geared to ensure better management and improve & track participants' interaction in the channel. **TechStack-Reactjs,Context Provider , sql with Flask graphql Apis**
  - As FullStack Developer, I lead the development of the admin control panel from scratch and provided inputs that lead to the creation of new features.
  - Designed and implemented Auth Flow, separation of roles, and Contributed to the creation of new APIs and improving old APIs structure.

## PROJECTS

### My Health

Aug 2022 - Present

FullStack Developer

- A healthcare app with functionalities like storing medical reports, and prescriptions and sharing them at ease and with the added functionality of filtering and searching records and many more. **Tech Stack- Nextjs with Typescript, tailwind CSS, GoogleApis and Trpc, NextjsAuth, prisma, postgres.**

### Other Projects

Jan 2022 - Present

- \* Social Media Backend with graphql \* Portfolio website with Nextjs & svelte \* Chat App with socket.io
